## MTH302:PROBABILITY AND STATISTICS

L:3 T:0 P:0 Credits:3

**Course Outcomes:** Through this course students should be able to

CO1:: recall the concept of random variables and its distribution functions.

CO2:: recognize relationships among the variables through correlation and regression.

CO3:: apply probability distributions to find the solution of different engineering problems.

CO4:: describe sample, population and statistical inference.

CO5:: understand hypothesis testing and its applications.

# Unit I

# **Random Variables and Probability**

**Distributions**: discrete and continuous random variables and their distribution functions, joint probability distributions, mean, variance and covariance of random variables, Chebyshev's theorem( without proof)

## Unit II

**Correlation and Linear regression**: scatter plots, correlation coefficient and its properties, Karl Pearson's correlation coefficient, Spearman's rank correlation coefficient, Linear regression and its properties

### **Unit III**

**Special Discrete Distributions**: bernoulli process, binomial distribution, negative binomial distribution, geometric distribution, poisson distribution, moment generating function ( without proof) of the above mentioned distributions.

#### Unit IV

**Special Continuous Distributions**: normal distribution, gamma distribution, exponential distribution, moment generating function (without proof) of the above mentioned distributions.

#### Unit V

**Point Estimation and the Central Limit Theorem**: the central limit theorem(without proof), unbiased estimator, consistent estimator, efficient and sufficient estimator, maximum likelihood estimation

## **Unit VI**

**Testing of Hypothesis**: types of error, Z-test for single mean and difference of means, Student's t-test for single mean and difference of means, F-test, Chi-square test for goodness of fit

### **Text Books:**

1. PROBABILITY AND STATISTICS FOR ENGINEERS AND SCIENTISTS by RONALD E. WALPOLE, RAYMOND H. MYERS, SHARON L. MYERS, AND KEYING YE, PEARSON

### References:

- 2. FUNDAMENTALS OF MATHEMATICAL STATISTICS by S.C.GUPTA AND V.K.KAPOOR, SULTAN CHAND & SONS (P) LTD.

Session 2023-24 Page:1/2
